project :

Introducing Potential Opportunities in Applying DRI for Research and Building Professional Skills for Persons Living with Visible and Invisible Disabilities

Project Execution

Problem 1. Limited access to DRI tools for persons with disability 2. Checking EDIA approach in training resource 3. Lack of an Internal association inside DRA for persons with disability	Solution A) Organizing an event B) Establishing an association C) Accessibility assessment of DRI tools and materials	Unique Value Proposition Addressing these barriers through targeted training, enhanced accessibility features in DRI tools, holding events, and establishing the association can create more equitable opportunities for researchers with disabilities within academia.	
	Key Metrics Checking EDIA approach after the project	User Profiles Target audience and early adopters Students, researchers and persons living with disabilities	User Channels Universities
	Resources Required University's centers for accessibility and Experts	Contributor Profiles Contribution types and ideal contributors Counseling Giving ideas Collecting feedbacks	Contributor Channels DRA and Universities
